

Helifuel Tanks

Suretank's Helifuel Tanks offer a robust design which integrates well into the designs of its many helifuel dispensing system manufacturers worldwide. Whether clients require vertical or horizontal, approval to DNV or Lloyds, Bureau Veritas or ABS, Suretank can supply the tank for client application.

Safety is key in the dispensing of aviation fuel and is a major consideration in the design, manufacture and quality of Suretanks helifuel units.

Pneumatically-operated bottom outlets, multi-sensor level indicators, vacuum and pressure relief valves, ground-operated valves, full walkways, fall arrestors, and DNV2.7-1/EN12079 approval are key features of the Suretank Helifuel units.
