

# ISO Tanks

**In a world of increasing globalisation, international transportation is key to mobilising equipment and cargoes. Suretank's ISO Tanks comply with all international regulations, allowing these units to be transported globally (including IMDG, ADR, USDOT, RID, CSC).**

Units can be further upgraded to include ASME U stamp and DNV2.7-1 for greater safety and security of cargoes. Individual country requirements such as GOST-R, RTN, NORM-05, Worksafe Australia, NORSOK, API can be added plus a range of options for use of different classification societies such as Lloyds, Bureau Veritas, ABS, RMRS, Germanischer Lloyds Register, DNV and others.

Suretank offers a wide range of vessel materials, internal tank linings/coatings, heating systems, cooling/refrigeration systems, baffling, bunding and valve systems to the customer's choice.

Frames are available in 10ft, 20ft, 30ft and 40ft sizes, with capacity ranging from 5000L to 50000L.

## Offshore ISO Tanks
